

To watch to the webinar please go to: [Executive Order 13607](#).

If you experience difficulties with the above link, please select either of these links [alternate link 1](#) or [alternate link 2](#).

Having trouble viewing an archived webinar presentation in Windows XP? You may need to configure you media player:

1. Bring up Windows Media Player.
2. If you do not see a menu bar with the following options (file, view, play tools, help) click the "Alt" button and release.
3. Select "Tools"
4. Select "Options"
5. Select "Network"
6. Highlight "HTTP Auto detect"
7. Select "Configure"
8. Select "Auto detect proxy settings"
9. Select "Ok"
10. Select "Ok" once again
