DOD LOGO GUIDELINE

The DOD logo and the DOD seal are not interchangeable. Follow these usage guidelines:

The DOD logo may be used, in keeping with brand standards, in all DOD communications across all media platforms.

• The DOD seal has very restricted usage. See Page 4 for more information.

MAIN LOGO	Stacked Logo	DOD Icon	Colors
U.S. Department of Defense	U.S. Department of Defense		DOD Blue нех 355е93 ков 53/94/147 смүк 64/36/0/42 рмs 653 С
The DOD logo consists of the Pentagon icon and type set in Crimson Text Regular. The horizontal version should be used in most cases where the design allows. Example usage: High-quality printed materials and certain web applications	The stacked logo should be used in narrow spaces where the primary logo will not fit, mostly in print and broadcast applications. Avoid using at small sizes, as it can become illegible.	The Pentagon icon can be used by itself in certain applications; however, the stacked version is preferred. Examples of icon usage are various broadcast products, as a background texture/ watermark, or any other application in which the text of the logo would become illegible.	Steel Blue HEX aebfd4 RGB 174/191/212 CMYK 18/10/0/17 PMS 651 C

TWO ADDITIONAL COLORS: The DOD logo should be presented in the DOD Blue colorway when the design allows; however, there are two additional colorways that are acceptable:

1	Main Logo – Dark	Stacked Logo – Dark	lcon – Dark	Colors	
	U.S. Department <i>of</i> Defense	U.S. Department <i>of</i> Defense		DOD Black Smoke Gray нех 141414 нех аdadad ков 20/20/20 ков 173/173/173 смук 0/0/0/92 смук 0/0/0/32 рмз Black 6C рмз Cool Gray 6C	
2	Main Logo — Light	Stacked Logo – Light	lcon – Light	Colors	
	U.S. Department <i>of</i> Defense	U.S. Department of Defense		WhiteSmoke GrayHEX ffffffHEX adadadRGB 255/255/255RGB 173/173/173CMYK 0/0/0/0CMYK 0/0/0/32PMS NAPMS Cool Gray 6C	

FOR ADDED CONTRAST: One-color variations are available for use in certain applications where additional contrast is needed in the detail of the Pentagon icon.

Small-Use Logo The small-use logo and simplified icon are designed specifically for rendering at small sizes and should ONLY be used on specific web and broadcast applications. This small-use logo should be used on web when the logo is rendered at a size between 510px wide and 320px wide. **Example usage:** Banners of websites U.S. Department of Defense U.S. Department of Defense U.S. Department of Defense Small-Use Icon The simplified icon should be used when the icon is rendered at a size **between** 135px wide and 40px wide. Example usage: Favicon, video bugs, app icons **NOTE:** Only the horizontal logo and icon are appropriate with the simplified Pentagon icon. Do not use the simplified Pentagon icon in the stacked logo.

DOD LOGO APPLICATION

How to apply the DOD logo in conjunction with other MC&FP brands and campaign/program marks. Included are examples of existing marks.

General Design Guide

When applying the DOD logo to existing or new Military OneSource signatures – brand, properties and program marks – use the DOD **Stacked Logo** for high-resolution reproduction. In cases where "U.S. Department of Defense" may be illegible, use the DOD **Icon.** For even smaller usage — webpages, social graphics or app development - use the Small-Use Icon.

High-Resolution Version (Stacked Logo)

Rule thickness can vary, but generally it should not be thicker than the oval around the Pentagon.

Align baselines 2x dash

Small Version (DOD Icon)

Rule thickness can vary, but generally it should not be thicker than the oval around the Pentagon.

Signature should be slightly shorter than the DOD Icon. Center both vertically to each other.

Web Version (Small-Use Icon)

Use dash for spacing reference (from top edge of Pentagon and base of interior).

Rule thickness can vary, but generally it should not be thicker than the oval around the Pentagon.

Signature should be slightly shorter than the Small-Use Icon. Center both vertically to each other.

Examples of High-Resolution Logo Lockups

For all logo lockups, always position the DOD logo to the left.

For high-resolution reproduction such as printed materials, letter-sized PDFs or full-screen presentations, use the DOD **Stacked Logo.** Whenever possible, this lockup should be used. If the DOD logo and signatures need to appear as a reverse (white against a dark field), refer to the first page of this PDF that outlines other versions of the DOD logo that accommodate this requirement. And the same goes for each signature.

MILITARY IN LASTING TRIBUTE

U.S. Department of Defense

For all logo lockups, always position the DOD logo to the left. Use the DOD **Icon** in place of the stacked logo if the "U.S. Department of Defense" may become illegible. This can be typically found in small-space reproductions such as business cards or on-screen presentations. The way to truly check whether to use this small version versus the web version is if the details of the DOD icon are still discernible.

Use the **Small-Use Icon** for logo lockups when designing webpages, social graphics or apps where the logo lockup falls below 600 pixels or less.

Examples of Small Version Logo Lockups

MILITARY **ON**^LSOURCE

Educational & Developmental

Examples of Web Version Logo Lockups

ON SOURCE

DOD LOGO APPLICATION

Examples of how the new DOD logo and Military OneSource signature lockups can work in various materials and media.

Flyer

For the Relationship Wellness Summit flyer that's part of the larger RE THE WE relationship initiative, use the logo lockup that uses the DOD **Stacked Logo** along with the campaign mark.

For general Military OneSource flyers, use the horizontal DOD logo at the bottom.

Registration Webpage

For the cover of a web-based registration page that includes a vertical white column 133 pixels wide, the DOD **Small-Use Icon** is applied since it falls below the 135 pixel threshold.

Here, the Small-Use Icon sits below the RE THE WE campaign mark and the Military OneSource logo. The DOD logo should always be nested at or near the bottom as the legitimizing signature.

PowerPoint Graphic

With a dark blue background, the DOD **One-Color – White** logo is used along with the white version of the RE THE WE campaign mark and a white rule between them. It is possible to use the DOD **Stacked Logo – Light,** but because it will be a presentation, the logo details rendered in the lighter smoke gray color may not be as visible from a distance.

Military In Lasting Tribute Website

For most web properties such as this one, the area for logos is relatively limited. Responsive design, navigation components, layout aesthetics and many other factors affect how branding is incorporated. This particular site uses the DOD **Small-Use Icon** with the Military In Lasting Tribute logo as a lockup.

DOD SEAL GUIDELINE

The following guidelines help to ensure a consistent use of the DOD seal in all applications.

The DOD seal's use is restricted to official DOD top leader correspondence, legal documents, reports, memoranda, ceremonial booklets, certificates and awards.

The DOD Seal and Its Use

This is the official seal for the DOD.

Description: An American bald eagle with wings displayed horizontally grasping three crossed arrows and bearing on its breast a shield of 13 pieces Argent and Gules, a chief Azure. Above the eagle an arc of 13 stars with alternating rays. Below the eagle a wreath of laurel to dexter and olive to sinister. On an encircling band the inscription "DEPARTMENT OF DEFENSE" at the top and "UNITED STATES OF AMERICA" at the bottom. When illustrating the seal in color, the background will be medium blue; the eagle and wreath proper; the arrows, stars and rays yellow/gold. The encircling band will be dark blue with yellow/gold edges and letters in white.

Minimum Sizing

The DOD seal has a minimum size standard that must be adhered to in all usage cases; the seal may be used at a larger scale as needed.

The DOD seal should not be rendered smaller than:

Avoid

The official DOD seal should in no way be edited or presented in any way except how it is displayed above. The size of the seal is the only variable that can be changed, while adhering to the minimum sizing requirements outlined above.

Clear Space

Clear space is the open space around the seal and gives the seal ample breathing room from other text, images or graphics. The more clear space given to the seal, the stronger impact it will have.

Clear space around the official seal is equal to the thickness of the outer blue ring.

When using the seal in applications where the width is less than **150px**, the allocated white space must double.

Protected by Law

The DOD seal is **protected by law** from unauthorized use and may NOT be used for nonofficial purposes. There is no substitute for the DOD seal that may be used by non-DOD personnel that would represent the DOD.

The following DOD and military seals **may be used only by the** military departments for official purposes. These seals may be displayed in federal buildings but **not** on agency flyers or other promotional materials. These seals are not authorized on county, state or federal modes of transportation.

The DOD's brand guide can be found here: https://www.defense.gov/Brand-Guide
